Request for Information (RFI)

RI460-2019-01 for External Engagement for the Assessment of Annual Cancer System Performance Indicators

Please see the answers below regarding any questions raised in relation to this RFI.

1. Question:

What is the organization currently tendering to procure?

Answer:

The Partnership requires support to engage external partners to select a new set of system performance indicators for cancer control. At this stage, we would like to determine interest from Proponents to inform on the following for a future development of a procurement initiative:

- Expert advise to develop the best strategy to continuously engage external partners in the span of 3 to 4 months and through three distinct stages, as outlined in the RFI.
- Advice and procurement of effective online tools (and other tools, if necessary) to engage external partners on an iterative fashion.
- Data collection and analysis of the information gathered in this process to inform the final suite of system performance indicators.
